

Conflict Materials Policy Statement

Dodd-Frank Act and related U.S. Securities and Exchange Commission rules
(this document is available in English only)

On July 21, 2010, the Dodd-Frank Wall Street Reform and Consumer Protection Act (Pub.L. 111-203) was signed into law. The Dodd-Frank Act and related U.S. Securities and Exchange Commission rules require certain companies to disclose the extent to which the products they manufacture or contract to manufacture contain so-called conflict minerals sourced from mines in the Democratic Republic of the Congo ("DRC") or adjoining countries. Conflict minerals include tantalum, tin, tungsten and gold, which are used in many electronic components and computer products.

ESO Electronic, as an electronics contract manufacturer, is not able to certify the country of origin of the minerals contained in the products manufactured by our suppliers. With respect to those limited aspects of ESO Electronic's business in which products are manufactured or contracted for manufacture using the above-named minerals to achieve the required functionality or in production processes, we certify that we do not directly purchase any conflict minerals from any source. Furthermore, we endeavor not to purchase products that contain conflict minerals that may directly or indirectly finance or benefit armed groups in the DRC or adjoining countries. ESO Electronic also expects its suppliers to source minerals solely from responsible, non-conflict sources.
